## EMPLOYMENT EXPERIENCE

#### 2025-Present | Substitute Teacher | Prince William County Schools | Prince William County, VA

■ Substitute teaching for kindergarten through 12th-grade classes, as well as music and art classes.

## 2015-2024 | Frontend Developer | Optimo-IT | Manassas, VA

- Contributed to the development of responsive interfaces for various USPS platforms, including USPS's Informed Delivery<sup>™</sup> web application using React, TypeScript, JavaScript, Java, JSP, WebSphere, Spring Boot, and Bootstrap.
- Created responsive HTML email templates for USPS, ensuring cross-email client and web compatibility using Java, HTML, and Litmus.
- Supported Google Cloud operations and DevOps tasks using UNIX, Jenkins, Artifactory, and SonarQube.
- Ensured 508/WCAG compliance through documentation and accessibility workshops.

#### 2009–2015 | Graphic Web Designer | Tiber Creek Consulting | Fairfax, VA

- Created responsive interfaces for National Guard and Department of the Navy portals using HTML, CSS, JavaScript, jQuery, Adobe Flash, SharePoint Designer, and Joomla.
- Styled icons, graphics, and branding for multiple platforms while ensuring 508/WCAG compliance.
- Created prototypes and mockups to support portal design and functionality enhancements.

## 2006-2009 | Digital Media Artist | Applied Research Associates | Raleigh, NC

- Modeled and Textured 3D assets for military training simulation software and visual elements for proposals and marketing materials using Adobe Creative Suite and Autodesk 3DS Max.
- Produced interactive and print materials, proposal graphics, and trade show displays.

### 2005-2006 | Adjunct Instructor | Surry Community College | Dobson, NC

 Instructed Traditional Illustration and Computer Graphic Design as an adjunct instructor for two semesters using Adobe Illustrator, Adobe Photoshop, and Quark Express.

## **PROJECTS**

#### Portfolio Website: www.tmontgo.com

- Built a dynamic React-based website showcasing professional projects, resume, and a "How It's Put Together" section explaining technical approaches.
- Developed a full-stack task management application hosted on the Google Cloud platform, featuring a React frontend, Node.js backend, and PostgreSQL database.
- Integrated features such as CSV file uploads, calendar views, light/dark themes, and metrics dashboards for visualizing task performance and progress.
- Ensured 508/WCAG compliance and implemented Material-UI for a modern, responsive UI.

## Tarot Reading Website: <u>www.eztarotz.com</u>

- Engineered an Al-powered web application providing personalized 3 or 5-card tarot readings by integrating with Google's Gemini API for dynamic interpretations.
- Frontend developed with HTML, CSS, and JavaScript, hosted on Firebase Hosting.
- Backend implemented as a serverless Cloud Function for Firebase, managing API requests and data processing.

#### Ad-Free Weather Website: www.ezweatherz.com

- Developed a clean, ad-free weather application using Next.js and TypeScript, focused on delivering a simple and fast user experience.
- Utilized Docker for containerization and deployed on Google Cloud Run for scalability.
- Sourced real-time weather data from the National Weather Service (NWS) API.

## **OBJECTIVE**

Innovative UI/UX/Web Developer with extensive experience in building responsive, accessible, and engaging web applications. Eager and passionate about exploring and leveraging AI technologies to push the boundaries of user-friendly website design and development.
